

## Mulch

Texas Pure Products Mulch is premium quality 2-inch native-hardwood, whole-tree grind mulch, making it a nutrient provider from first application. Unlike bark or nugget mulches, Texas Pure mulch does not have a “nitrogen pull” on the soil as the nitrogen source is built in at the grind with leaves and cambium layers providing the nitrogen source. This elegant mulch includes fines.

Native

Aged

Large Grind

### Specifications

#### Native Hardwood Mulch:

Local native hardwoods ground twice to 2 inches rich in fines. Mulch size may be adjusted to meet specific requirements.

#### Aged Hardwood Mulch:

Receives an additional grind after aging for six months to achieve a naturally darker finished color.

#### Large Grind Mulch:

A larger grind mulch used on pasture lands, rustic landscape designs, or other low aesthetic applications.

Red

Black

Brown

**Colorized Mulch:** Red, black and brown are created using a natural iron oxide - an organic approach to providing aesthetically appealing uniform shading for design applications. Colors are professionally applied, coloring each piece of wood in a uniform, consistent manner batch to batch. These organic mulches are safe and non-toxic to pets and children.

Weight: Approximately 15 pounds per cubic foot

### Application and Installation

- Use Texas Pure Products mulch in all areas under trees and landscape plantings to prevent weed seed germination, to protect plant roots from temperature extremes and to reduce evaporation of essential moisture from the soil.
- Create beautiful natural pathways with Texas Pure Products Mulch.
